Damage from a fire Saturday morning at the filling station at Humphreys was confined to an electric stove, according to Cindy Gott of the Galt Fire Protection District.

The stove, which she said cannot be used anymore, was near a back window that Ms. Gott said was broken.

Ms. Gott said something on the stove burned. The cause of the fire was unknown. She said the Sullivan County Sheriff's office was investigating.

The business was closed at the time, with an alarm system alerting authorities.

Firefighters were on the scene nearly one hour.
