The Livingston County Library at Chillicothe presents a Container Gardening program the night of April 28th.

The program is to be "hands on". Participants are to plant in a pot or container that the participants take to the program---and then take home. That pot or container is to be no larger than 14 inches in diameter.

The cost of the program is \$20, which includes potting mix and 5 plants.

In addition to demonstrating proper methods of planting, a representative from an area greenhouse is to discuss how to choose plants suitable for container gardening, and how to maintain them.

Advance registration is required. It can be done at the Livingston County Library at Chillicothe, or by calling the library. Payment is due before April 25th. The program is the night of April 28th at 6 o'clock.
