Highway 69 near Bethany to be repaved

Road Work

Paving of Highway 69 in the Bethany area and Harrison County Route A is planned during the next few weeks. Preparatory work will take place before the resurfacing.

MoDOT says sections of Route A will be closed while the contractor paves the entire width of the road. The closures will be in three to five mile segments.

An expansion device is to be installed June 4th in the Route A Bridge over Interstate 35. Until that area is paved, "bump" signs will alert motorists to the rough road conditions. Crews also will be working on the spur of Highways 69 and 136.
