Two representatives of the Chula Fire Department made a request at this week's meeting of the Livingston R-3 Board of Education, discussing the possibility of installing a helipad on the school property in Chula. The school administrator plans to check with the school's insurance carrier regarding liability before any decisions are made by the Board of Education.

Members did approve a new agreement with the American Red Cross making the Chula School a "community shelter" if needed in the event of an emergency.

The public hearing on the school tax levy is scheduled for 8 o'clock on the evening oof Tuesday, August 14th at the Chula School.
