

Portion of WESTERN Linn County under a boil water advisory

Health Advisories

Linn-Livingston Public Water Supply District #3 has issued a precautionary boil advisory. The northern boundary for the advisory area is Highway 36. The eastern boundary is Locust Creek. The southern boundary is Fountain Grove. The western boundary is the Linn-Livingston county line. Thus Linn-Livingston Public Water Supply District #3 customers south of Highway 36 to Fountain Grove, and those between Locust Creek and the Linn-Livingston county line have a precautionary boil water advisory until further notice, for "drinking and cooking water". The boil advisory was caused by a broken water main.
