

Water issues for rural Livingston County and Spickard

Health Advisories

A precautionary boil water advisory has been issued for some customers of Livingston County Public Water Supply District Number Four.

Once a water leak has been repaired, a 48 hour precautionary boil advisory will be in effect between Livingston County Road 503 and Route U on Highway 190.

The advisory to boil water for cooking and drinking would be in effect until Friday.

The town of Spickard (in Grundy County) may have customers without water periodically this Friday as fire hydrants are replaced. The project is expected to take much of the day so water customers are being alerted to the possibility they could be without water at various times of the day.

A 24 hour precautionary boil water advisory will be effect through Saturday for all of Spickard.
