Trenton Police are looking for public assistance in determining WHO was driving what investigators believe to be a "high profile" vehicle that struck and damaged a parked car. The accident happened while the car was parked near 13th and Cedar in Trenton last Thursday while that operator, Diane Hulett, was attending classes at North Central Missouri College. A police report indicated there was considerable damage done to the parked car, and another vehicle is believed damaged as well. As of Monday morning, police had no suspects.
