The Missouri Department of Transportation plans to resurface Highway 129 in Bucklin this year. The project will include removing and replacing pavement, approaches, and sidewalks between Washington Street and West Third Street.

This will require temporary easements from property owners along Highway 129. Over 40 property owners will be affected. The temporary easements are needed to allow a contractor to work more easily in the area. MoDOT's "Right-Of-Way" staff will be at the Bucklin Community Center on Thursday, April 4th to meet with the property owners. The hours are from 8 to 4 o'clock. No appointments are necessary.
