MILAN, MO. -- For a number of months Milan has been watching the birth of its brand new amphitheater.

Now, construction for the amphitheater is almost complete. The amphitheater will have a stage with a three foot high concrete slab with a metal structure roof. Seating will be tiered down.

Milan City Administrator Jim Onello said it has been a long process, but well worth it. "It's been a little bit frustrating," Onello said. "We had no cooperation from the weather. And obviously we hoped to have the amphitheater in place, but we want to make sure we do it right. Something that Milan residents and the community can be proud of."
